

Gas sensor KSIM 1530

for detection of R134a

Features

- The gas detector measures the selected gas concentration
- The gas detector is part of the digital KIMESSA CANline BUS-Network which is designed for up to 128 gas detectors and alarming units
- linearized and temperature-compensated digital CANline-BUS output signal
- 16...30 VDC supply voltage (4-wire cable)
- various gas sensor technologies available (electrochemical, Infrared, pellistor, semiconductor)

- factory calibration with calibration certificate to the specified measuring range
- Zero & Span potentiometers and calibration jack socket accessible from outside without opening the gas detector enclosure
- water- and dust-proof IP 65 enclosure
- rust-proof and acid-resitant steel enclosure
- Swiss-Made

Gas sensor KSIM 1530

Sensor specifications

Measurement principle:

application

0...10'000 ppm

-30 °C ... +50 °C

atmospheric ± 10%

< 2% signal loss/month

6-8 years, depending on the

15...90 % R.H. non-condensing

approx. 1 hour

0...2500/5000/10'000 ppm

Housing

IP 65 Housing protection: Material: rust-proof and acid-resistant Weight: 550 g

Specifications electronic

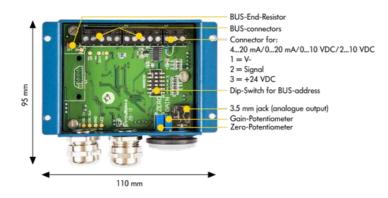

| Wiring analogue: | 3x 0,75 mm2, shielded |
|-------------------------|-----------------------|
| Wiring digital: | 4x 1,0 mm2, shielded |
| Supply: | 16.530 VDC |
| Power consumption: | max. 80 mA |
| Output signal analogue: | 420 mA / 020 mA |
| Output signal digital: | KIMESSA CANBUS |
| Switching output: | no |

Specifications construction

| Cable gland: | 1x M16 (digital 2x M16) |
|--------------|-------------------------|
| Cable entry: | bottom |
| Tests: | CE |
| Display: | no |
| Position: | position independent |

Inspection (Maintenance)

calibration is recommended once or twice a year.

The sensor and the electronic require an inspection. Routine

3.5 mm jack (analogue output)
